

Air Quality Policy

Okanagan FC has an Air Quality Policy in place that is centered around our number one concern for the health and well-being of our players and staff.

Our policy will be to adhere to the BC Soccer Air Quality Best Practice Guideline and to modify or cancel/reschedule training sessions and matches when the BC AQHI (British Columbia Air Quality Health Index) shows that the local air quality is a cause for concern.

AQHI less than 4 will mean practices and matches will go ahead as normal

AQHI 4-6 will mean that practices and matches may be modified to allow for poor air quality conditions.

AQHI 7 and higher will mean that practices and matches will be postponed or cancelled.
